Date of Request: _____

Request Made by: _____

HIV 101 covers what HIV is and how HIV is transmitted, HIV testing options and locations as well as ways to prevent transmission of HIV. State level and local statistics will be shared and any myths about HIV will be corrected. At the end of each presentation, staff will allow time for question and answers.

STI 101 covers each sexually transmitted infection, transmission, signs and symptoms, and ways to reduce risk for contact with STI's. At the end of each presentation, staff will allow time for question and answers.

HIV 101/STI 101 is a combination of both sessions.

HIV counseling and testing: The Wayne State University Prevention Team (WSUP) provides free confidential rapid HIV testing. The test gives results in 20 minutes or less. Each test is accompanied by prevention counseling by one of our Michigan HIV certified test counselors.

HIV/STI information table: The Wayne State University Prevention Team (WSUP) will provide educational materials such as: visual display boards, pamphlets on sexual health, STI and pregnancy prevention, abstinence, testing, and other similar topics. Safer sex packages (a small package with prevention materials such as condoms, lube, and instructions on how to use a condom) can be requested for distribution on the table.
